### DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 13-20 and 71-79, drawn to a population of hematopoietic progenitor cells, classified in Class 435, subclass 372.

II. Claims 21-27, drawn to a nucleic acid, a vector, a host cell, classified in Class 435, subclasses 69.1, 252.3, 320.1.

III. Claim 35, drawn to method for identifying a ligand, classified in Class 435, subclass 7.1.

IV. Claims 36-38 and 48-51, drawn to a ligand and a reagent, classified in Class 530, subclass 380.

V. Claims 41-47 and 52-70, drawn to method of isolating hematopoietic stem cells, classified in Class 435, subclass 2.

2. Inventions III and V are different methods. These inventions require different reagents, acting through different process steps, with different modes of operation, and different endpoints. Therefore, the inventions are patentably distinct.

3. Invention I, II, and IV are different products. They are distinct because their structures are different, i.e., a cell is different than a nucleic acid and a nucleic acid is different than a ligand. Therefore, the inventions are patentably distinct.

4. Inventions IV and III, and IV and V are related as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)).

In the instant case, the product as claimed can be used in materially different processes, such as to produce antibodies.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

7. Any inquiry concerning this communication from the examiner should be directed to Dr. Gerald Ewoldt whose telephone number is (703) 308-9805. The examiner can normally be reached Monday through Thursday from 7:30 am to 5:30 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (703) 308-3973. Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1600 receptionist whose telephone number is (703) 308-0196.

Papers related to this application may be submitted to Technology Center 1600 by facsimile transmission. Papers should be faxed to Technology Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CM1 Fax Center telephone numbers are 703-872-9306 (before final) and 703-872-9307 (after final).
